

The screenshot shows the MySQL Installer download page for MySQL 8.0.44. The page has tabs for "General Availability (GA) Releases" and "Archives". The main content area is titled "MySQL Installer 8.0.44". It includes a note about MySQL 8.0 being the final series and MySQL 8.1 using a MySQL product's MSI or Zip archive for installation. Below this, there are dropdown menus for "Select Version" (set to 8.0.44) and "Select Operating System" (set to Microsoft Windows). Two download options are listed:

Version	File Type	Version	Size	Action
Windows (x86, 32-bit), MSI Installer	(mysql-installer-web-community-8.0.44.0.msi)	8.0.44	2.1M	Download
Windows (x86, 32-bit), MSI Installer	(mysql-installer-community-8.0.44.0.msi)	8.0.44	558.3M	Download

A note at the bottom suggests using MD5 checksums and GnuPG signatures for package verification.

The screenshot shows the MySQL Community Downloads page. At the top, there are links for "Login Now" and "Sign Up for a free account". Below this, a note states: "An Oracle Web Account provides you with the following advantages:" followed by a bulleted list:

- Fast access to MySQL software downloads
- Download technical White Papers and Presentations
- Post messages in the MySQL Discussion Forums
- Report and track bugs in the MySQL bug system

At the bottom, there are two buttons: "Login >" and "Sign Up > for an Oracle Web account". A note below the buttons says: "MySQL.com is using Oracle SSO for authentication. If you already have an Oracle Web account, click the Login link. Otherwise, you can signup for a free account by clicking the Sign Up link and following the instructions."

No thanks, just start my download.
